

I urge you to reject the NAB's petition 04-160 which will prohibit the broadcasting of instant traffic and weather reports on satellite radio. I pay for this service and cannot understand why you are even considering this petition which is an infringement of the constitutions freedom of speech. Are you going to also dictate what music we listen to? I cannot understand why a community service like the weather channel(which saves lives in the threat of severe weather) would be limited to am, fm radio.

sincerely, Susan Mildren
